

Current participants
have already collected
OVER 2000 TONS
of hard-to-recycle
plastics!*

- 20ct Drawstring Orange Bags
- Includes printed list of accepted items on bags
- For use in participating Hefty® ReNew® Program areas

AN EASY SOLUTION FOR HARD-TO-RECYCLE PLASTICS!

This program collects plastics that can't be recycled traditionally and turns them into valued resources.

- An easy addition to your current recycling routine.
- Keeps more plastics out of the landfill.

HOW IT WORKS

① Throughout the Week

CONTINUE RECYCLING

Keep up the good work!
Continue placing recyclable items in your recycling cart.

② Trash & Recycling Day

NEW!

START COLLECTING HARD-TO-RECYCLE PLASTICS

Fill the Hefty® orange bag with acceptable hard-to-recycle plastics.

Tie up the full orange bag and place it in your curbside recycling cart, or at a recycling drop-off facility, along with normal recyclables.

The recycling truck will pick up & deliver the bags to your local recycling facility (MRF) as part of routine service.

③ Ongoing

Recyclables continue to be sorted at your local recycling facility and sent to processing facilities for new use.

The orange bags are also sorted at your local recycling facility and sent to a facility for use as valued resources.

WHAT GOES IN THE BAG?

All items must be clean, dry and free of foil lining.
