IMPORTANT NOTICE

**RE: SB 1383 Required Organics Recycling
Effective: May 1, 2022**

**Please see the back side of the
postcard for more information.**

Dear Inglewood Customer:

On behalf of the City of Inglewood, Republic Services, your waste haul service provider, would like to make you aware that Beginning May 1, 2022, Inglewood residents will use their existing green cart that was previously used for yard clippings, will NOW be used for both green waste and organic waste, meaning, food scraps, food-soiled paper and yard clippings too.

The change in cart use is driven by the Senate Bill 1383. All California cities must comply with this mandate. Multifamily properties and commercial businesses in Inglewood that have not already signed up for mandatory recycling programs will be issued a container for use to ensure compliance with the State law for recycling and organics.

This new requirement is part of a Mandatory Recycling Ordinance established to reduce waste previously discarded in landfills.

For questions regarding this new program, please contact Republic Services at 800-299-4898

*Kindly,
Republic Services*
