Mahogany Pro-Chip Mulch

Republic Services Pro-Chip Mulch is manufactured at Newby Island Landfill. Pro-Chip Mulch is made from clean dimensional lumber and recycled pallets. The recycled wood is ground through a 2-inch minus screen and ran over two magnetic heads.

The uncolored Pro-Chip Mulch is run through a colorization machine to a specific color. Information about our colorant can be found at www.Colorbiotics.com.

Specifications	Particle Size
Mahogany Pro-Chip Mulch is manufactured from clean, recycled wood. Color-treated with mineral pigment.	1" – 2", and not less than 3/8" in width and 1/16" in thickness. *Material is unsorted and contains fines
