

Injection Well Disposal

Republic Services offers Injection Well Disposal as an alternative to wastewater treatment for Class 1 and Class 2 non-hazardous industrial waste.

REPUBLIC[®]
SERVICES

Sustainability in Action

Republic Services is a leader in environmental services. Through the acquisition of US Ecology, ACV Enviro and ECOFLO, we now offer customers comprehensive Environmental Solutions, including Injection Well Disposal.

Our Class 1 and Class 2 industrial injection wells in Winnie and Dayton, Texas, and Detroit, Michigan, offer safe and compliant disposal for non-hazardous liquid waste streams, including PFAS-contaminated liquid waste. These strictly regulated facilities have large volume capacity and accept high-concentration PFAS liquid waste from all over the U.S. Our EPA-compliant solutions eliminate future environmental impacts and protect human health.

Transparent pricing

Advanced treatment technologies

Compliance and safety

Accepted Waste for Injection Well Disposal

- PFAS production and use including aqueous film-forming foam (AFFF)
- Solids
- Sludges
- Leachate
- Ammonia
- BOD and COD materials
- End-of-life products, like spent cleaning solvents
- Pollution control residuals, like concentrates

Value of Our Injection Well Disposal

- Cost-effective solutions
- Reduced risk and environmental impact
- Safe and compliant
- Aligns with EPA guidance for PFAS-contaminated liquid waste
