

# Sustainable Resources for Carlsbad Businesses

Republic Services is committed to providing reliable and responsible recycling, organics, and waste solutions for the City of Carlsbad. We are proud to partner with the City of Carlsbad's Sustainable Materials Management Division to assist with Senate Bill (SB) 1383 requirements. Every day, we work to ensure safe and dependable solutions in a way that is easy, effortless, and environmentally responsible.

Republic Services provides a wide array of free services and support for the businesses in Carlsbad, such as:

## Technical Assistance

Per Senate Bill (SB) 1383, all businesses are required to have recycling, trash and organics services. Our trained experts offer a variety of technical services to help your business stay compliant, including educational presentations, hands-on trainings, workshops, diversion opportunity assessments, facility walk-throughs, and ongoing support from local Sustainability Advisors. At the conclusion of a technical service, a Sustainability Advisor will follow up with recommendations for waste reduction, contamination prevention, and service level modifications.

## Right Sizing

Are you unsure if your current service levels are meeting your business needs or if you need to recycle more? Our team of experienced advisors can assess your business's specific needs and recommend the appropriate service levels.

## Customized Flyers and Communication Materials

We offer customizable flyers and signage that can be easily edited to fit your business's needs. Options to change include: identifying the location of recycling and solid waste containers; providing information regarding who to contact on-site if the containers are full or overflowing; and how to notify property management of illegal dumping concerns.

Don't let waste catch you off guard. Take advantage of our free support services to ensure that your business is prepared and compliant.

Sustainability in Action

## Sustainable Solutions for Carlsbad Businesses

Environmental sustainability is a top priority for the City of Carlsbad. The Sustainable Materials Management Division is dedicated to protecting the environment by encouraging businesses to reduce waste and assisting businesses to meet diversion requirements. We offer a variety of programs such as:

### Sustainability Champion

We recognize businesses that are leading the way in environmental sustainability as Sustainability Champions. These businesses showcase innovative and efficient sustainable practices. Interested businesses are encouraged to apply for consideration.

### Bins for Businesses

We support efforts to properly divert waste through organics and recycling collection by providing free compost (green) and recycling (blue) bins and educational signage to eligible businesses (while supplies last). The program has varied options for all business sizes and types.

### Outreach materials and technical assistance

We help your business comply with state and local environmental regulations with tailored outreach and education. Additionally, we have a comprehensive set of resources to educate your staff and customers, including flyers, posters and a Solutions Manual & Product List.

We are committed to helping businesses become more environmentally sustainable through public education, outreach and resources. Our Sustainable Materials Management team is always happy to help and can be reached at [sustainablematerialsmanagement@carlsbadca.gov](mailto:sustainablematerialsmanagement@carlsbadca.gov).
